

Burro Fire Activity and Management:

- As of 17:00, June 11th, the Burro Fire was at 2,684 acres with 0% containment. The fire had been at a little over 900 acres the day before. At this time, no structures have been lost, and no injuries or deaths reported.
- In addition to the critical fire weather (high temperatures, low moisture, and high winds), the fire is exhibiting "fuels driven behavior" - growth is fueled by the fire finding heavy dry and downed conifer and spruce. Strings of aspen are being used as natural barriers to the fire, as they are not yet dry enough to be receptive to fuel rapid growth of the fire.
- Active firefighting is occurring along the western and southern edges of the fire, in the Bear Creek Canyon area. Attempts to limit growth to the north (into the Forest Service Road systems) and east will be made.
- The Burro Fire is now being managed by the Type I incident management team managing the 416 Fire in La Plata County. Resources (including air resources) can be shared between the two fires more effectively with this management model.

San Juan National Forest Stage 3 Fire Restrictions:

- The SJNF, as of this morning, is under Stage 3 fire restrictions. (More information on the specifics of the restrictions can be found here: <https://www.fs.usda.gov/detailfull/sanjuan/home/?cid=fseprd583149&width=full> and posted in Cortez Dispatch.)
- Included in the restrictions is the restriction of access to McPhee Reservoir from the shore. The Forest Service will be actively patrolling the lake to enforce the restriction. The lake is still open for boating, however. At this time, the lake can only be accessed from the boat ramp for boaters; all other areas (such as House Creek) are closed.
- **The Forest Service is allowing access to certain individuals that need to travel through the NF.** Those that need to access livestock, private property, and utility companies are encouraged to contact Debbie Kill with the Dolores Public Lands Office: 29211 Highway 184, Dolores, CO, phone: 970 882 7296 between 08:00 and 16:30 to get a letter of authorization for travel.
- Other services, such as youth outfitters, guide services, and timber operations have been suspended.
- The Dolores/Norwood Road will remain open, all arterial roads will be closed.
- Road 38 (West Fork/Dunton Road) will be closed in the Black Mesa area, shortly after Dunton.
- At this time, no other NFs in the area are closed. Uncompahgre and Rio Grande NFs are open and under Stage 1 restrictions (campfires and smoking is still allowed in developed campgrounds.)
- Other area lakes, such as Groundhog and Summit Lake, that either sit on private property or are not in the National Forest, are available for recreation.

Public Information:

- The public is encouraged to call the following phone lines for information regarding the fire: (416 Fire: 970 385 8700), (Burro Fire: 928 351 7537), (Dolores Public Lands Office 970 882 7296)
- Social media site information for the 416/Burro Fires: (Facebook: @sanjuanNF or @416fire) (<https://inciweb.nwcg.gov/incident/5834/>) (www.fs.usda.gov/main/sanjuan) (Twitter: @SanJuanNF)
